

# Customized Training Programs

Need a specialized training program for your workplace? Our training team can develop a program tailored to the needs of your company, either through an online portal or live instruction. From course materials to hands-on activities, we ensure that our content will efficiently and effectively train your staff.

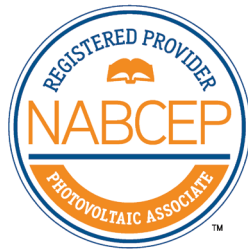

## Why customize training with us?

- » NCCETC has a network of the nation's top technical instructors, policy and financial analysts, and business leaders teaching our courses.
- » Training facilities, equipment, and accessibility to different types and sizes of renewable systems make NCCETC an ideal training location. We also have a Mobile PV Training Unit to bring training to you.
- » NCCETC has workshops that can easily be customized or we can create an entirely new training based on your desired outcomes and learning objectives.
- » NCCETC is a NABCEP PV Associate and Continuing Education Registered Provider
- » NCCETC can provide continuing education credits (CECs) or professional development hours (PDHs) to your attendees through organizations including AIA, USGBC, APA, BPI, and more.
- » We handle all the logistics for you!

We have worked with public/ government, private, and non-profit organizations.

Examples of custom trainings include: fundamentals of solar training for technicians, firefighter and first responder safety courses, tailor solar and and clean energy policy workshops, solar and electric vehicle training for code officials.

We provide training that supports your needs in the industry now - NCCETC staff and stakeholders have decades of experiences working in clean energy industries and have extensive knowledge and expertise that can support you!
