

NC CLEAN ENERGY TECHNOLOGY CENTER

Customized Training Programs

Clean Energy Training Provider of the Year

Did you know?

Alongside delivering our nationally-awarded Renewable Energy Technologies Diploma Series, we offer customizable workshops for your organization!

Services include:

- Customization of course content based on your desired outcomes and learning objectives
- Management of logistics associated with the specific training course
- Coordination of materials for the course such as notebooks, textbooks, and certificates of completion for each participant
- Submission of continuing education credits
- Coordination of NABCEP Associate Exam registrations for those who complete REPV
- Coordination of hands-on activity

Choose from workshops such as:

- REPV: Fundamentals of PV Design and Installation
- REPV (A): Advanced Design and Installation
- Operations and Maintenance of PV Systems
- Solar Storage
- PV Tech Sales
- Hands-on PV Workshops
